Our Goal

Our main goal is to make our customers more profitable by saving them time and money. A system that reduces your workload and makes you more

Improve

Smart It offers increased productivity, greater profit, improved performance and ultimately, business success.

Always Evolving

Smart It is always evolving to satisfy the growing needs of our customers. Suggestions to enhance the software are always welcome.

Switching to SI+ is a breeze

Data transfer from your current accounting program to smart-it is smooth and problem free.

General Ledger

The General Ledger is the heart of Smart It. All transactions appear in the General Ledger. This is a very powerful module and will provide you with a full audit trail of transactions to ensure the integrity of the system. It provides financial information to make important decisions and track profits and losses. There are no lengthy month end or year-end procedures as the system is date driven. VAT stress is eliminated as you are able to print an accurate and reliable VAT report, with a summary, analysis and problematic entries.

Invoice & POS

The Invoice and Point of Sale (POS) module has been designed for fast and easy invoicing for all types of retail stores. Our Point of Sale system is easy to use with numerous keyboard shortcuts for fast entry. The POS software supports bar code readers/scanners for faster checkout and inventory control. It is also able to operate on touch screen terminals.

THE FUTURE OF ACCOUNTING & MANAGEMENT SOFTWARE IS HERE

IT'S NEVER BEEN EASIER TO GET MORE PRODUCTIVITY AND POWER FOR YOUR ORGANISATION

CUSTOMER & SUPPLIER

The customer & supplier module in Smart It provides you with a new and exciting way to manage debtors & creditors. It starts with being able to swiftly capture customer and supplier details. Bookkeepers and admin staff love the ease of performing customer & supplier journals, payments & receipts as well as amending errors. Our Age Analysis is unique and allows tracking and following up on outstanding monies by using an advanced filtering and search facility. This is coupled with easy bulk emailing of statements and sms's direct from the customer screen.

STOCK CONTROL

This outstanding module will assist you with managing stock, reducing cost, increasing sales and improving cash flow. Doing bulk changes or updates to thousands of stock items takes a few seconds. The purchase planning system will suggest reorder quantities, based on regression analysis over a pre-determined period, taking the Supplier lead time into account. Goods receiving and stock takes can be performed using item bar codes for speed and accuracy. Regular, or instant stock takes add flexibility for stock control.

Workshop

The integrated workshop module is ideal for automotive workshops, fitment centres, computer workshops and the like. It is an essential tool for the efficient management of the daily workflow. It allows a user to allocate stock, labour and sundry items to job cards, which can be converted directly to a customer invoice. Quotations can be converted into a job card and then to an invoice, or directly to an invoice. Supplier orders can be generated from the quotation or job card. Smart-it increases workshop productivity by integrating critical repair and service information via the job card system, thus improving customer satisfaction.

Quotes & Sales Orders

The quote module allows you to create quotes quickly and accurately. Quotes can be converted into a job card, pro forma invoice, invoice or sales orders. Previous quotes can be used to produce similar quotations to save time and reduce errors. The sales orders created directly from the quotation assist users with efficient sales order processing. Order fulfilment using the 'Allocate stock' facility is an accurate, flexible and quick way to allocate limited stock amongst many orders.

SMART IT IS DESIGNED TO DELIVER COMPLETELY INTUITIVE AND INTEGRATED EXPERIENCE FOR USERS

WORK IN POWERFUL NEW WAYS

E-COMMERCE

Have your own e-commerce website that is fully integrated with Smart It.

Smart It has the ability to interface with Prestashop, a leading e-commerce platform used by over 200 000 online stores. Add full description, category, combinations (size/colour/etc), features and multiple pictures in SI and sync to web locally and offline at the click of a button. This allows you to have one source of data for your products thus saving huge amounts of work and time. Sales orders on your local database is made automatically for web orders and syncs tracking numbers and order status.

DASHBOARD

The dashboard is a great tool to view the health of your business. The dashboard gives an overview of all of the key areas that need to be monitored daily. Sales achieved / comparisons, cash flow, stock holding, debtors, creditors and a financial rating on one screen.
